INTRODUCTION

OVERVIEW

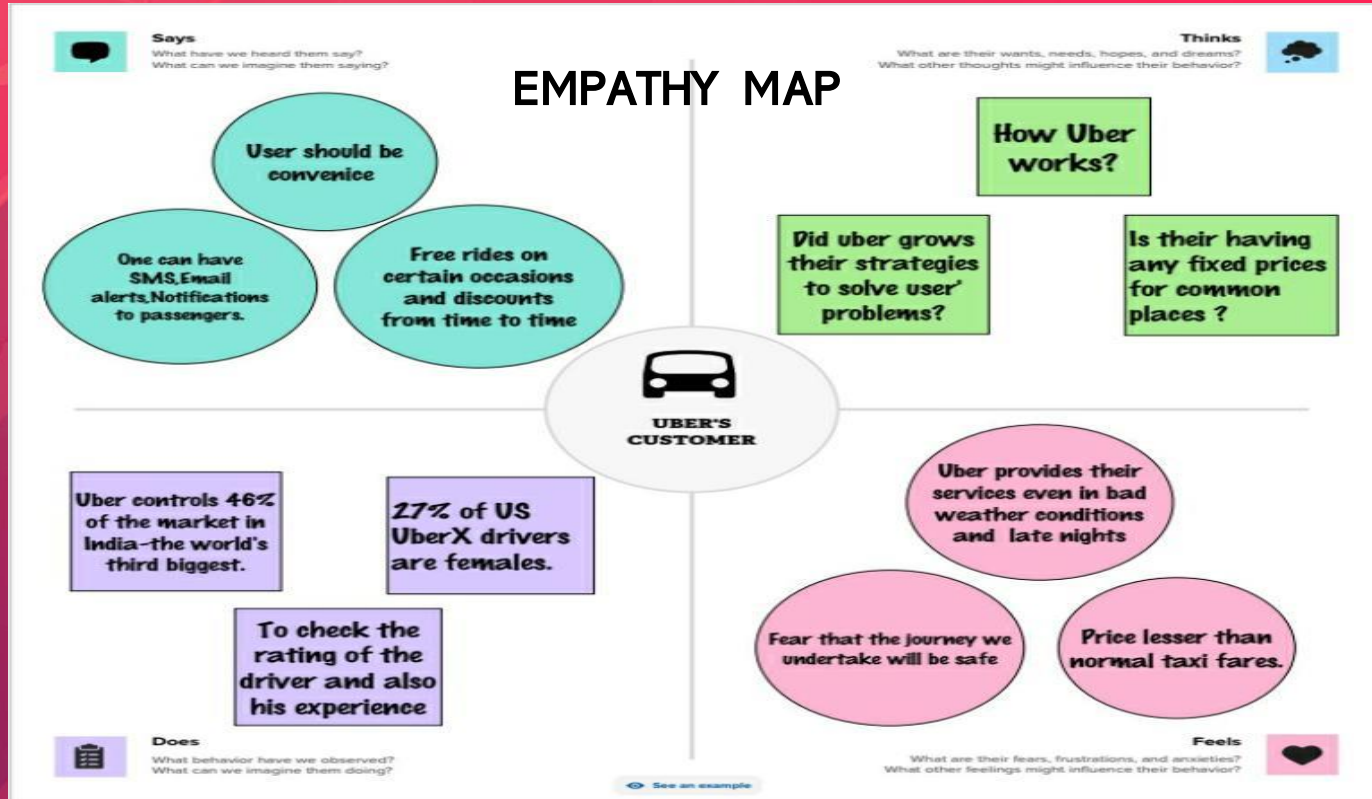

- Uber is a multinational transportation network company that operates a ride-hailing platform
- Uber provides a convenient way for Individuals to request rides from drivers who use their personal vehicles
- Uber drivers analysis refers to the analyzing the number of trips taken by user drivers can provides insights into their overall activity and the demand for rides in specific areas
- This analysis can help Uber drivers decide where to focus their driving efforts for maxi efficiency and profitability

PURPOSE

- The major of our project is to use data analyzing techniques to find unknown patterns in the Uber drivers dataset
- The research is carried out on Uber drivers data collected from the year 2016

PROBLEM DEFINITION & DESIGN THINKING

IDEATION & BRAINSTORMING MAP

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

+

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

1 Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

2 Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

3 Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

"Problems faced by Uber users are taking too long to arrive, cancelling ride without notice, behavioral issues of the drivers, asking for directions, women safety, surge pricing and dropping at wrong location".

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Person 1

Other shared by community

Check the recent location of the driver

Prioritize issues based on the current facilities

Person 2

Check the time of needed vehicles

Use team feedback to plan routes

Person 3

Problems in cities are not solved by drivers from other cities

Share problem with service via WhatsApp number and feedback

Person 4

Describe calling of the driver right after his experience

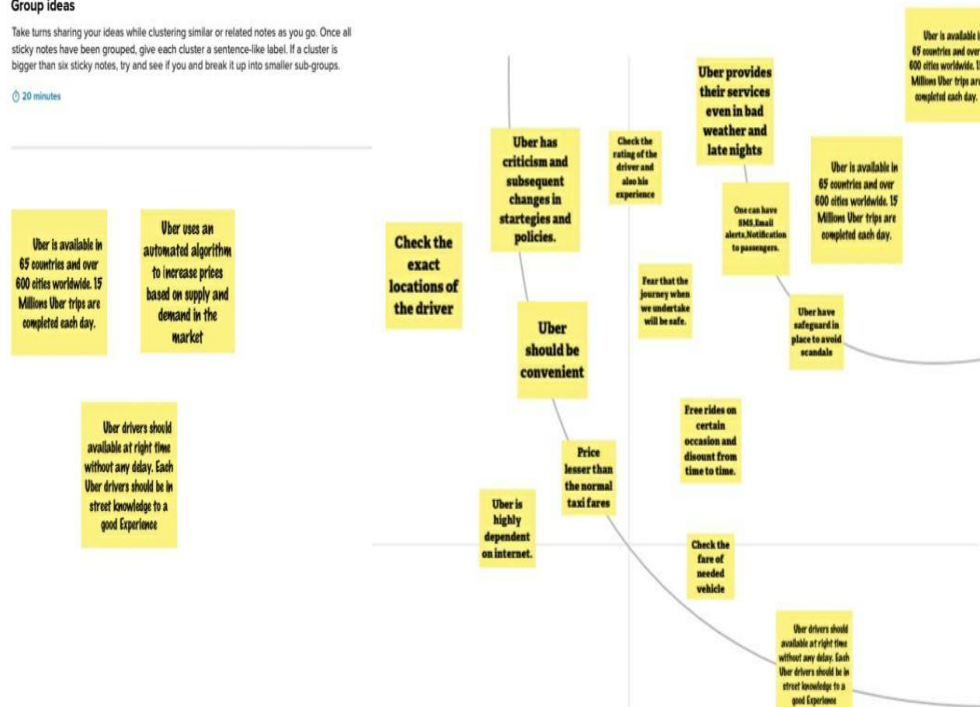

Use the driver data as evidence in customer advice call

Use the highly experienced personnel

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

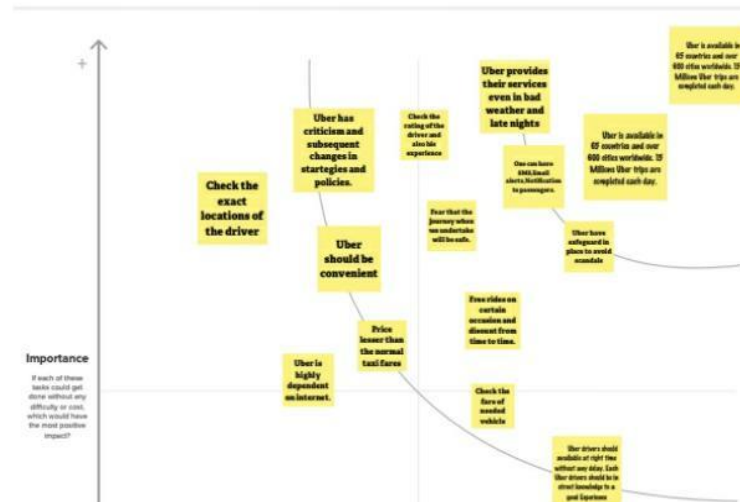

5

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

<i>ADVANTAGES</i>	<i>DISADVANTAGES</i>
Driver performance evaluated using feedback from customers	Possibility of receiving negative reviews
Uber has become a prime example of the gig economy at work	Uncertainty about the payment rate for each ride
Safety is an important advantages for drivers working with Uber	Drivers are responsible for all cars expenses

APPLICATIONS

- Determine the criteria for evaluating drivers performance such as customer ratings, completion rate, cancellation rate, average trip duration and feedback for drivers
- Assess drivers efficiency by analyzing metrics such as average time spent waiting for passengers, average distance per trip, and idle time between trips

CONCLUSION

1. Bar graph showing the purpose of Uber with Miles covered
2. Bubble chart showing distribution of Miles with Category
3. Bar graph showing Quarter with Number of Trips
4. Highlight Table shows Month with Number of Trips
5. Area Chart showing Week with Miles
6. Bar graph showing Month with Miles
7. Pie chart showing Quarter with Miles
8. Bubble chart showing hour with Number of Trips
9. Tree Map showing Distance between the Start and Stop Location

FUTURE SCOPE

This analysis refers to future scope as follows

1. Understand the relationship between driver and passenger demand in different areas and at different times
2. Analyze drive routes and identify patterns to optimize navigation and reduce travel time
3. Identify peak hours and high-demand areas to optimize drivers allocation and increase customer satisfaction
